

New Domtar Reply Card Stock Items!

Domtar is pleased to announce that we’ve expanded our 7 PT Reply Card line-up to include four new roll items stocked at our Ashdown Mill. The popular sizes include convenient 40” and 50” diameters.

Domtar’s Reply Card runs well on press, is dependable for inserting, and performs well on any project even with higher ink coverage. Efficiently run to a 7.0 target caliper minimum, Reply Card complies with U.S. Postal Service regulations.

We’ve updated our specifications to help customers accurately plan projects and avoid the hassles of coming up short. Domtar 7 PT Reply Card is manufactured to 79 lb. basis weight, with 92 brightness, good opacity for minimal show-through and low Gurley porosity; making it ideally suited for inserts as well as other offset printing applications.

To best facilitate these changes, we are providing new item codes for all stock items. We will continue to sell old items until inventory is depleted and will replenish with new items as part of this rolling change. Effective the week of January 14, 2013, all machine production will reflect the updated specification information.

Vellum Reply Card - Cartons						
New Item Code	Old Item Code	Basis Weight	Sheet Size	M Weight	Sheets/ Carton	Cartons/Pallet
