### *More information about ECOLOGO:*

*Founded in 1988, ECOLOGO is administered by UL, a global independent safety science company, and is one of North America's most stringent and established multi-attribute environmental standard and certification marks. Especially well-known in Canada, ECOLOGO addresses multiple environmental attributes of products, and indicates that a product has undergone rigorous scientific testing and auditing. For example, Domtar's certified products must demonstrate acceptable fiber sourcing and manufacturing practices, while meeting stringent criteria on chemical use. Because of its holistic focus throughout the entire life cycle of a product, ECOLOGO provides proof of environmental leadership in a marketplace crowded with "green labels".*
