

New Packaging for the Xerox® Paper and Specialty Media Line

In September, Domtar announced a whole new packaging look, a realignment of the product line as well as a series of product enhancements for our Xerox® Paper and Specialty Media Line. This packaging refresh provides a modernized look with straightforward language that quickly describes product features, benefits and usage.

We are pleased to inform you that the change to the new packaging has begun. In December, you will begin to see the Xerox® Vitality™ Office Papers in new packages starting with the Xerox® Vitality™ Multipurpose Printer Paper (previously Xerox® Business 4200). All SKU numbers and UPC codes in the Xerox® Paper and Specialty Media Line will remain the same. Early in 2015, the Xerox® Bold™ Digital Printing Papers, followed by the Xerox® Revolution™ Specialty Media will begin to transition. All items will be updated on a rolling basis as current inventory is depleted.

For detailed information regarding individual items please contact your customer service representative or account manager. For further information on the line reorganization, new packages and enhancements please go to www.domtar.com or www.egpaper.com.
