

Xerox® Business 4200 Xpress Multipurpose Paper Update

Xerox® Business 4200 Xpress Multipurpose Paper (3R11415) is now available in a newly enhanced bulk carton design.

The new carton design features a moisture proof coating on the carton, a removable lid and a side that folds down flat for easier removal of paper. This convenient bulk pack contains 2,500 unwrapped sheets of paper, eliminating the need to remove ream wrap, resulting in greater productivity and efficiency. While the packaging has changed, the paper inside continues to set the standard year after year for multipurpose papers.

Xerox® Business 4200 Xpress Multipurpose Paper is a 92 bright, 20 lb. multipurpose paper that is ideal for everyday documents and provides 99.99% jam-free operation. It is an everyday workhorse that is tested for dependability and reliability, saving you time and money with less equipment downtime, fewer service calls and greater productivity.

The enhanced carton design is not only perfect for production printing environments (where the elimination of ream wrap saves time and money), but is also perfect for office environments to improve convenience while eliminating waste and clutter. In any environment, the sheet count of 2,500 sheets means the carton weighs less and is easier to carry and store.

Domtar will be refreshing the packaging look and name of this product later in the year to reflect the recently announced Xerox® Paper and Specialty Media Line updates.
