Domtar's ci2000 Now Offered in Lighter Weights Improved Yield with Lower Postal Rates

Domtar is pleased to offer two new basis weights, 20 lb. and 22 lb., for ci2000®, our premium envelope paper. Both basis weights are available now and can be purchased with a 44,000 lb. minimum order (5,000 lbs. per size). Narrow rolls are also available from our rewind centers.

Take advantage of these new lighter weights to help save on postal costs, or add more content to your printed piece. With savings of 10-20% compared to 24 lb. or 28 lb. papers, lighter weights for high volume projects help you stretch your budget.

ci2000 customers enjoy proven performance on high speed converting equipment as well as excellent print quality from flexographic, offset or digital print applications. Now with four basis weights to choose from customers can utilize 96 brightness ci2000 for all components of a direct mail piece or promotional campaign. Along with its super smooth silky feel, lighter weight ci2000 offers better opacity and less show through compared with standard envelopes in comparable weights.

Basis Weight 17 X 22/500	GSM	Brightness GE	Opacity	Smoothness*	Caliper
20	75	96	88	70	3.3
22	82	96	90	70	3.6
24	90	96	92	70	4.0
28	105	96	94	70	4.6

*Grade manufactured to basis weight and caliper

From envelope, to colorful insert, to transpromo statement, ci2000 is an ideal choice for your full color print projects. Samples of ci2000, including our new weights, are available from your Domtar Account Manager or you can order them directly from SampleXpress (800-923-2204).

Forest Stewardship Council™ (FSC®) certified ci2000 is part of the Domtar EarthChoice® family of products.
