**Domtar is a North American forest products company that holds a leadership position in the wood products market. We are a leading producer of lumber and other wood products for the residential construction and home renovation markets, as well as for specialized structural and industrial applications.**

### **SUSTAINABILITY, OUR WAY FORWARD**

Forest certification and fiber tracking confirm the sustainability of our fiber supply. Strict adherence to internationally recognized sustainable forest management and chain-of-custody standards provides our customers with the assurance that the wood fiber we use originates from responsibly managed forests.

### **WOOD PRODUCTS STORE CARBON**

The lumber and other durable wood products we manufacture typically have long shelf lives during which they effectively store carbon for the life of the product. Given the social and environmental benefits they provide during their lengthy life cycles, our wood products are well-suited to a carbon-constrained, energy-efficient world.

### **DID YOU KNOW?**

The wood used to build the typical North American house stores 22 metric tons of carbon dioxide.

This is equivalent to the greenhouse gas emissions of one car over more than three years.

## FAST FACTS ON OUR WOOD PRODUCTS BUSINESS UNIT

A leading North American producer of construction-grade lumber, decking, engineered wood products and other wood products in a growing market.

Wood products facilities: **21**

Lumber production capacity: **2.9 billion board feet/year**

Remanufactured wood production capacity: **82 million board feet/year**

Engineered wood production capacity: **145 million linear feet/year**

Wood pellet production capacity: **45,000 metric tons/year**

Our U.S. sawmills produce dimension lumber and decking from Southern Yellow Pine, and supply chips and other wood residues to third-party pulp and paper mills and other end-users.

As at November 30, 2024

## ABOUT DOMTAR

Domtar is a leading, privately held manufacturer of diversified forest products, with a workforce of roughly 14,000 employees in more than 60 locations across North America. The company has an annual capacity of 9.1 million metric tons of pulp, paper, packaging and tissue annually, and has an annual production capacity of about 3 billion board feet of lumber and other wood products. Formerly known as the Paper Excellence Group, Domtar is comprised of legacy businesses Paper Excellence Canada Holdings Corporation, Domtar Corporation and Resolute Forest Products.

Domtar prides itself on operational excellence, delivering sustainable, high-quality and cost-effective products to meet and exceed customer needs globally. The company is committed to turning sustainable wood fiber into everyday essential products. Domtar's principal executive office is located in Fort Mill, South Carolina.
